PROJECTS:

ITM Group

May 2019 - September 2019

- **Project Type:** E-Commerce
- **Role:** Developer
- **Team:** Size: 2

Technologies: Java, Mysql, HTML, Javascript

Project Summary:

The basic idea of this project is to make the admission process convenient and paperless for both students as well as for college administration, thought this system students can check all the required details for a particular course like fee structure, course curriculum, other campus facilities, etc.

Similarly, the college administration can use this system to make the admission process online, store details of all the students at a single place in an organized and efficient way.

IndiaTrip

January 2019 - May 2019

- **Project Type:** E-Commerce
- **Role:** Developer
- **Team Size:** 2

Technologies: Java, Mysql, HTML, Javascript

Project Summary:

India trip is a web-based application that helps travelers to find and explore some of the best destinations all around India with all the details and reviews, they can also search top rated hotels for their comfortable stay. This system is not limited to only travelers, Hotel owners can also post their hotel details

So that customers can easily approach them and book hotels in advance.
